

Our Story

Macrium's vision is laser-focused on providing the most reliable and effective data backup and recovery solutions possible.

Nick Sills, CEO

Here at Macrium Software, we design solutions to protect the most valuable asset in the world – your data. We're dedicated to creating dependable software, providing quality service, and maintaining superior relationships with our customers and partners. We love what we do and we take pride in our success.

From the very beginning, Macrium was designed to be better. As a developer, CEO Nick Sills knew the importance of backing up his computers, and trusted one of our competitor's most popular solutions would keep his data secure. But when a vital backup was unable to be restored, he said to himself, "This can't happen again, and I can create a better solution."

15 years later, the suite of Macrium products is known for being one of the most reliable, scalable, and dependable in the industry. Millions of people across the world rely on us to keep their valuable data safe and accessible, and our easy-to-use solutions can be found in homes, small businesses, public sector networks, multinational companies, and more.
